

Why downscale NatureScape to TRBScape?

- 🌲 Vastly different geographic extents
 - 🌲 May result in different cores, linkages, and buildouts
 - 🌲 May result in changes in the relative importance/influence of targets within cores and linkages
- 🌲 Reiterate NatureScape at an appropriate regional scale

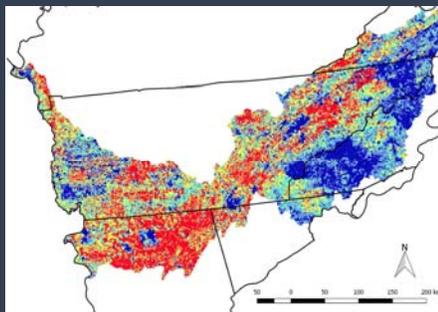

Leonard, et al. 2017

Why does scale matter?

Coarse results compared to previous aquatics models for the TRB

Overall macroinvertebrate score from NatureScape

EPT score for macroinvertebrates from TVA data (AppLCC funded 2015)
